

Circle Payments, Payouts and Accounts

Build your unified payments platform with dollar digital currency

Businesses looking to leverage the power of digital assets need a stable, secure way to bridge the gap between traditional payment rails and the evolving blockchain ecosystem. Circle enables you to connect with customers who want to pay with both digital currency and via traditional methods and send USDC payments across many blockchains to vendors, suppliers, customers and others. Own your user experience, build an end-to-end platform and open your business to the world with our digital-native payments and treasury, available via easy API integration.

The Circle Account

Your home for business growth

Your free Circle Account is your single portal for digital-native payments, treasury and custody. Power your business across multiple blockchains, reduce costs and settlement times and expand your reach to millions of new customers. Access USD Coin (USDC) straight from the source, send and receive dollar digital currency on-chain and allocate funds to earn returns on your USDC balance*. Streamline your business operations by managing your transactions directly from the Circle Account, via the Merchant Dashboard.

*Institutional rewards in limited beta

Power faster, cheaper on-chain transactions

Accept digital currency and traditional fiat payments

Reach new markets by giving your customers more ways to pay with our Payments solution. Accept card, bank and crypto payments globally through one powerful integration, with the ability to embed a unified front end checkout experience that matches your brand's look and feel. All transactions settle in USDC in your Circle Account.

Accept the following:

- USDC , BTC*, and ETH*
- Credit and debit cards
- Apple Pay and Google Pay
- ACH, SEPA and wires
- Silvergate Exchange Network (SEN)
- Signet

*in limited beta

Send programmable global payouts

Automate payouts to customers, suppliers and vendors anywhere via traditional and blockchain rails with our Payouts solution. Blockchain payouts made with USDC enable businesses to send value at the speed of the internet, saving on costs and reducing payout processing time from days to nearly instantly.

Pay out via:

- USDC, EUROCC, BTC, ETH and MATIC
- ACH and SEPA
- Wire transfers
- Visa Payout Network

Embed digital asset flows into any project

Empower your users to fund their accounts with the currency of their choice, while facilitating peer-to-peer transactions and enabling easy funds transfers across numerous accounts. Our Accounts solution enables internal ledger management, on- and off-chain transfers that streamline costs, and secure custody of digital assets via a branded, wallet-like customer experience.

CASE STUDY

BIGTIME

Big Time turned to Circle for financial infrastructure that brings NFTs and blockchain gaming together. Circle's integrated suite of Payments, Payouts and Accounts APIs enables players to fund their accounts with debit and credit cards, wire transfers and USDC to participate in the Big Time Marketplace and power their AAA gaming experience.

CASE STUDY

Dapper

Dapper Labs processes transactions for over 1.6 million users through popular NFT games, including NBA Top Shot. Dapper chose Circle to enable fast, simple payout capabilities to bank accounts and digital asset wallets globally.
